Shootings in Philadelphia 2021

Philly's #1 crime in 2021 is gun violence.

Where the shooting took place is denoted in blue by default in calendar year 2021. The red is where condos are listed on sale as of March 2022. The color is not easy to change in ARGIS maps.

The tool tip for the blue dot displays the demographic that was targeted, the date of the incident, the neighborhood the incident took place, and whether the shooting was fatal or non-fatal.

Safety of a neighborhood or security in place should influence condo pricing. Because there was no easy way to retrieve crime score by city, a map overlay was used of Philly 2021 shootings over where condos are currently on sale to get a sense of how safe a neighborhood appears to be.
